	7,663	7,913	8,517	8,253	8,192

1. Manufacturing employers total 52, of which 8 companies employ over 100, totaling 3,408. Manufacturing shows a decrease of 322. When tabulated, 13 companies had gains of 65 people and 26 companies had losses of 323.
2. Of the 356 businesses surveyed, 16 did not respond to the residence item; thus, 290 people were put into the "Other Locations".
3. The City population as of 12/31/08 is estimated to be 13,700 compared to 13,550 in 2007. The Town of Hartford population was 3,992 as of 12/31/2008 compared to 4,011 in 2007.
4. Examples of the number of employees commuting from "Other Communities" to work in Hartford, to the extent as reported by employers:  
West Bend 600, Slinger 349, Milwaukee 292, Rubicon 275, Mayville 249, Iron Ridge 216, Hustisford 187, Neosho 174, Jackson 138, Horicon 136, Beaver Dam 119, Watertown 105 and Allenton 103. The preceding are 13 communities with 100 or more commuters out of 156 residence-communities tabulated. These 13 communities alone supply a total of 2,943 employees to work in Hartford's industries.
5. Information for this survey was gathered through written questionnaires and telephone interviews covering 356 business entities.
6. Due to reporting preferences, an assumption was made that 2 part time employees at an average of 20 hours worked have been converted to 1 full time employee.
7. Flashback: the base year of 1993 showed a total manufacturing employment of 2,545, at which time the City had a total population of 8,300 approximately.

\* Total includes temporary placement agency employees.
